

DIELECTRIC COATING KIT- EB"DC-P"

**COMPLETE EMERGENCY REPAIR
& MAINTENANCE KIT FOR DIELECTRIC
INSULATION COATING ON SUBSTATION BUS BARS,
OPEN / NAKED BUSBARS, JUMPERS,
LT / HT BUSHINGS, BUSBARS SPROUTS,
EPOXY MOULDED CT / PT.**

HY POXY present the perfect solution to emergency situation in your plant / substation.

HY POXY Dielectric coating KIT - EB "DC - P" is a complete maintenance kit for INSITU online coating permanently.

This shall allow INSITU repairs without cumbersome, messy, expensive & time consuming process of dismantling.

The kit is economical , portable , self contained & easy to use for instant & permanent repairs.

The CERAMIC HARD COAT – RED compound provides smooth & glazy self settling finish deposit which does not allow any Moisture or water to seep in (Permeate) and gives assured high dielectric strength of 16 KV / mm coating.

RECOMMENDED APPLICATIONS

- * Insulator coating by Ceramic Hard Coat to improve glaze & creep resistance.
- * Insulator coating to remove pitting defects.
- * Inside substation bus bar coating.
- * External open / naked bus bar coating.
- * Jumpers coating.
- * HT & LT Bushing dielectric coating.
- * Bus bars sprouts and supports coating by ceramic hard coat to prevent moisture absorption.
- * Epoxy moulded CT / PT coating by Ceramic hard coat to prevent moisture seepage.

S.NO	CONTENTS	STOCK	UNIT	QTY	USE
1	"HY POXY CERAMIC HARD COAT - RED"	H 300	1 Lb Pack	12	For long lasting extremely good glaze finish, moisture resistant dielectric coating on the surface.
2	REINFORCEMENT COMPOUND "HY POXY TITANIUM BOND"	H 900	1 Lb Pack	4	To repair the pitting defects permanently.
3	CLEANER CONDITIONER		1 Ltr Pack	6	Cleans & Conditions the surface area prior to application of compound.
